

Indeck Announces New Boiler Sales Team For Americas: Gallen and McNicholas Join Indeck in Key Roles

1888 Press Release - Indeck is focusing on international sales of its steam generation equipment and has hired Pat Gallen and Martha McNicholas to champion the Indeck boiler offering throughout North and South America. Both Gallen and McNicholas are experienced working with consultants, contractors and project engineers and will be traveling throughout their regions for boiler consultations.

Indeck Power Equipment Company welcomes Patrick Gallen and Martha McNicholas, PE. Gallen is the new Director of Business Development and will be leading Indeck's teams for both new boiler sales as well as rentals throughout the United States and Canada. McNicholas will oversee the Latin and South American Markets for new and used boilers sales as International Sales Manager.

Gallen brings over 18 years of experience in sales within the power generation industry. In his early days, Gallen was a successful Manufacturer's Representative in the Midwest for Zurn, Aalborg and Indeck. Over the span of his career, Gallen held a number of positions with industry leading companies where he led the charge on numerous, significant Capex projects in the power and industrial sectors.

"As the Business Development leader at Indeck, Pat Gallen will expand and enhance the company's position in the industry at both the end user and O/E and EPC levels. With his energy, work ethic, and experience, Pat, along with his sales teams, will prove to be of great value to the Indeck customer base," states Marsha Forsythe, Indeck President.

McNicholas has over 20 years of experience in sales within the power generation, boiler industry and mobile steam injection to oil wells industry in Central and South Americas. She is also experienced as a Manufacturer's Representative for boilers.

Forsythe adds, "Indeck is excited to have a Sales Manager dedicated to our customers, project owners and engineers in Latin America. Martha is based in Miami and will travel throughout South and Latin America to meet with clients. She is fluent in Spanish and is a Professional Engineer (PE), registered in the State of Florida."

Indeck Power Equipment Company, stocks boilers to 250,000 pph for immediate shipment on a lease/rental or sale basis. Indeck also custom designs and manufactures watertube boilers, solid fuel boilers, waste heat recovery boilers, HRSGs, thermal oxidizers, high temperature hot water generators, and specialty boilers to 1,000,000 pph. Indeck has shipped over 5000 boilers throughout the world.

For additional information see www.indeck.com or email info (@) indeck-power dot com . Indeck maintains a dedicated 24/7 emergency hotline for rental boilers, used boilers, or new boilers at 800-446-3325 or 847-541-8300.
